

## TECHNICAL PRODUCT UPDATE

### DOCUMENT UPDATES:

Kryton is constantly updating and creating new materials designed to assist you and your team to grow your business and help you sell more. Here are some recent changes that you should know about.....

**NOTE: Links to distributor portal will only work after you log in.**

**NEW LEAK REPAIR SELLING TOOLS:** Kryton now makes repairs easier with a new installation video designed to explain the simplified Leak Repair System. This instructional and informative video works to highlight the system's advantages, and reduces the learning curve. The video may be downloaded from our [distributor portal](#), and is easily referenced on our [website](#).

This training initiative is one of many sales support tools created and revised to support the newest product updates that keep us in line with the most current industry needs. [Application Instructions](#), [Technical Data Sheet](#), [Specifications](#), [Presentations](#), and [CAD drawings](#) have all been updated - so make sure the information you are referencing is up to date.

**NEW KRYTONITE TEST REPORT & SELL SHEET:** New test results prove Krytonite's superior swelling performance translates to stopping water. Concrete joints, using Krytonite, were recently tested using a modified version of the DIN 1048-5 test, which measures the permeability of concrete. Krytonite successfully maxed out the machine's capability and stopped 0.8MPa (8 bar) of hydrostatic water pressure.

Results have been added to the [TDS](#), [Sell Sheet](#) and a [Visual Sell Sheet](#) has been created, along with the [report](#) itself. With the addition of [Krytonite Adhesive](#), Dynamic pricing and the ability to use Krytonite and Krystol Waterstop Treatment together as a dual waterstop protection, it is no wonder why Krytonite is becoming the most popular waterstop on the market.

**NEW PRODUCT OVERVIEW PRESENTATION:** With Kryton's diverse product portfolio appealing to a wide range of new construction communities - as well as those looking to resolve problems and increase the life span of existing construction - communicating our product solutions can be difficult. To assist in these efforts, we've put together a [Product Overview Presentation](#) which provides a simplified overview of Kryton's products.

A valuable tool in the training of new employees, this presentation expands on our [Product Hierarchy](#) and categorizes products based on New vs Existing Construction, and groups them into Admixtures, Surface Applied Waterproofing, Construction Joints/Details, Repairs and Restore/Protect products.

Keep up to date - Be Sure. Be Kryton.
